### **DETAILED ACTION**

1. This action is responsive to the amendment filed November 5, 2009. In the instant amendment, claims 1, 17, and 26 have been amended; claims 9, 11-14, 16, and 25 have been canceled; and claims 34-38 have been added.
2. The 35 USC §112 rejection over claims 1-4, 6-8, 16, 17, 20-22, 24-26, 28-30, and 33 is withdrawn in view of Applicant's amendments.
3. Claims 1-4, 6-8, 17, 20-22, 24, 26, 28-30, and 33-38 have been examined, and all remained pending claims are allowed (renumbered 1-22).

### **Examiner's Amendments**

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
5. Authorization for this examiner's amendment was given in a telephone interview with Mr. Hankel, Registration No. 60,663, on January 11, 2010, to put the claims in condition for allowance.

### **IN THE CLAIMS:**

Claim 6 is amended as follows:

### **Claim 6** (Currently Amended),

Line 1, after "claim", delete [5], and insert - 1 - .

### **Examiner's Statement of Reasons for Allowance**

6. As Applicants pointed out in the Remarks filed May 26, 2009 (pages 8-14) and indicated in the previous Office action mailed August 19, 2009 (page 7), the prior art of record do not disclose and/or fairly suggest at least claimed limitations:

*"...a code generator for generating a language-independent tree of code expressions based on the token information, wherein the code generator receives the code in the at least one C# file inside the markup language file, and wherein the code expressions represent the markup file as a class;"* (claim 1, lines 7-10; claim 34, lines 5-14; Remarks, pp. 9-11);

*"...parsing the markup language file into tokens and providing a compiling system with detailed information about the parsed tokens, the detailed information including inline code from the associated C# file; receiving a command to create an intermediate language application;"* (claim 17, lines 6-9; Remarks, pp. 9-13); and

*"...receiving at least one code-behind file, wherein the at least one code- behind file contains a user code snippet and is associated with the received markup language file; parsing the markup language file into tokens and providing a compiling system with detailed token information, wherein the detailed token information includes non-code token information; receiving a command to create an application or library containing a binary tokenized representation of the markup language file; in response to receiving the command to create an application or library containing a binary tokenized representation of the markup language file, generating a binary file from the non-code token information, wherein the binary file contains one record for each non-code token;"* (claims 26 and 33; Remarks, pp. 13-14).

These claimed limitations are not present in the prior art of record and would not have been obvious, thus all pending claims are allowed.
